A. Rebecca Neal, Ph.D
Laboratory Director

20 July 2010

Dear Families,

The Child Development in Context Laboratory is looking for children to help our graduate student researchers learn how to administer the Autism Diagnostic Observation Scale (ADOS), a gold standard assessment that is used to evaluate children for symptoms of autism spectrum disorders. We are currently looking for children and adolescents who have been diagnosed with an autism spectrum disorder including autism, Asperger's disorder and pervasive developmental disorder, NOS. Participation would require scheduling and attending a 45-60 minute appointment in our lab for the ADOS administration. During the testing session, parents are welcome to observe the testing.

Please note that because this administration is for training purposes, we cannot give parents feedback about the testing. However, \$15 compensation will be provided. Free parking and snacks for your child will also be provided.

If you are interested in volunteering with your child, please contact Rebecca Neal at 512-475-8491 or neal@psy.utexas.edu.

Sincerely,

A handwritten signature in blue ink that reads "A. Rebecca Neal".

A. Rebecca Neal, Ph.D.
